PROFESSIONAL SUMMARY

Data Analyst with 3 years 10 months of experience in Power BI, SQL, Tableau, Excel, and Python, with hands-on experience developing dashboards, reports, data models, and business intelligence solutions. Skilled in Power BI dashboard development, DAX, Power Query, data modeling, SQL querying and validation, and Power BI Service for publishing and managing reports. Experienced in gathering business requirements, translating them into KPI-driven visualizations, validating data accuracy, troubleshooting reporting issues, and collaborating with stakeholders across healthcare analytics and reporting projects.

TECHNICAL SKILLS

Power BI: Dashboard and report development, DAX, Power Query, data modeling, KPI reporting, interactive visualizations, Power BI Service

SQL: Joins, aggregations, CTEs, window functions, data cleaning, duplicate detection, data validation, query-based analysis

Power BI Service: Report publishing, workspaces, dashboard/report management, scheduled refresh concepts, stakeholder reporting

Tableau: Interactive dashboards, trend analysis, visual analytics, KPI reporting

Advanced Excel: Pivot Tables, VLOOKUP, XLOOKUP, date functions, TAT calculations, conditional formatting, data cleaning

Python: pandas, NumPy, data cleaning, transformation, validation, basic automation

Data Analytics: Data cleaning, transformation, validation, KPI analysis, business requirements analysis

Domain: Healthcare analytics, claims data, provider data, insurance data, reporting

Tools: MySQL, VS Code, Microsoft Excel, Microsoft Word, Copilot AI

PROFESSIONAL EXPERIENCE

Senior Data Analyst — Healthcare Analytics | Cognizant Technology Solutions | Sep 2024 – Sep 2026

Processes: Claims Analysis | Insurance Data | Provider Data Management

- Designed, developed, and maintained interactive Power BI and Tableau dashboards and reports aligned with business KPIs, including claims-status visuals and KPI cards.
- Built and maintained data models using DAX and integrated data from SQL databases and Excel to support accurate and consistent reporting.
- Used SQL and Python to clean, validate, and analyze claims data, including duplicate claim ID and payment detection.
- Gathered and translated business requirements into dashboard requirements, KPIs, filters, and visual reporting outputs for stakeholders.
- Compiled raw client data from Excel and SharePoint and improved analysis throughput by 50% using Pivot Tables and VLOOKUP.
- Designed Tableau reporting for a financial claims portfolio covering 200+ client accounts to monitor KPIs and support claims and collection analysis.
- Collaborated with teams to investigate billing issues, resolve data/reporting concerns, and support payment-related discussions.

Data Analyst | Firstsource Solutions | Oct 2022 – May 2024

- Analyzed provider, practitioner, and claims data across US states to identify KPIs and trends using SQL, Python, Tableau, and Power BI.
- Built and maintained data models integrating SQL and Excel sources and automated claims amount and TAT calculations for reporting.
- Managed high-volume claims Payment analysis with a 95% collection rate and a 20% reduction in Overdue Claims amount.
- Reviewed claims and payment data in Excel, supported dispute resolution, and optimized invoicing analysis to reduce overdue receivable accounts.
- Used Excel, SQL, Tableau, and Power BI to prepare analytical outputs and stakeholder reports.

PROJECTS

Blinkit Sales Data Analysis | Power BI, SQL

- Analyzed Blinkit sales data using SQL for data preparation and validation and Power BI for interactive dashboard development.
- Built KPI cards, slicers, and visualizations to analyze total sales, average sales, item count, ratings, outlet type, outlet location, and product categories.
- Created a Power BI data model and DAX measures to support business performance analysis and interactive reporting.

HR Analytics Dashboard | Excel, Tableau

- Prepared and analyzed employee data using Excel and developed an interactive Tableau dashboard for HR analytics.
- Visualized employee count, attrition, attrition rate, average income, job satisfaction, years of experience, department, age, gender, job role, and education.
- Used filters and interactive visual analysis to explore workforce trends and support HR reporting.

Tableau Public: <https://public.tableau.com/app/profile/suriya.s3146/viz/shared/DX2XSB3HB>

Customer Churn Analysis | Python, Power BI

- Used Python with pandas and NumPy to clean, transform, and validate customer data for churn analysis.
- Developed an interactive Power BI dashboard to analyze customer churn patterns and key business metrics.
- Created visuals and filters to support customer-level and segment-level analysis.

EDUCATION

Madras University — MBA, Finance — Chennai | 2022 – 2024

Guru Nanak College — Bachelor of Commerce (General) — Chennai | 2019 – 2022

CERTIFICATIONS

- SQL — Certified
- Power BI — Certified
- Tableau — Certified
- Python for Data Analysis — Basics
- Advanced Excel — Certified
- Master's Program in Data Analytics

ADDITIONAL STRENGTHS

Business Requirements | Stakeholder Collaboration | Data Validation | Dashboard Development | Reporting | Problem Solving | Data Quality
